

GEOGRAPHY CURRICULUM OVERVIEW

GEOGRAPHY STATEMENT OF INTENT

The intention of the Geography curriculum at Our Lady's is that children are given opportunities to develop an interest in Geography through exciting and stimulating experiences. We have tailored our Geography curriculum to ensure that it is fully inclusive to all, and that all children from EYFS to Year 6 are taught skills and knowledge; appropriate for their year group, ensuring the progressive development of geographical concepts; knowledge and skills.

Within these active lessons, children at Our Lady's are exposed to new vocabulary and knowledge through skills that build upon what they have previously been taught. These skills give children opportunities to be independent when finding out new, information. This helps children to be confident when applying this knowledge in the wider world. The learning needs of individual pupils are addressed through careful scaffolding, skilful questioning and appropriate intervention, in order to provide the necessary support and challenge.

RECEPTION
